

# MOTORCYCLE AND SCOOTER SECURITY

Follow these simple security tips to help improve the security of your motorcycle or scooter:

**Lock your ignition** and remove the key.

**Fit a combined audible alarm/immobiliser.**

**Secure your motorcycle or scooter in a locked garage**, or as an alternative to a garage, consider installing a ground anchor point to secure your motorcycle or scooter.

**Uniquely mark and then photograph** your motorcycle or scooter. Mark with an ultraviolet (UV) pen, microdot or by other permanent means.

**Avoid leaving your helmet** or other possessions on the motorcycle or scooter.

**When parking at a public event**, check your motorcycle or scooter periodically.

**When spending the night at a caravan park or hotel**, park in a well-lit area or close to your room.

**Consider using a motorcycle cover** which should be secured to the machine. Where possible, lock the handle bars into place.

**Consider purchasing a motorcycle cable lock**, motorcycle disc lock, motorcycle security chain or a motorcycle U-lock.

**When travelling with others**, lock the motorcycles together, or if alone, secure the motorcycle to a fixed object.
